

LabVIEW Consultancy

Software Development

Custom software and LabVIEW solutions with modern technologies and frameworks

Modifying and Supporting Existing System

Enhancing, supporting, and troubleshooting LabVIEW systems for machine efficiency

Team Augmentation

Onsite and offshore teams collaborate for seamless development and support

Machine Vision System

Turnkey vision systems with NI software, hardware selection, and integration

NI Hardware

Selection and sourcing of NI hardware for your test system requirements

NI Platforms

AI Platforms

24/1, 6th Cross, Thaneerpandal Road,
Peelamedu, Coimbatore -641014,
Tamil Nadu

Partner

SYSTEM INTEGRATION

Partner with Unilogic to

Build robust, high-performance applications using NI LabVIEW, TestStand, VeriStand, LabVIEW RT, FPGA, and Python/AI integrations – tailored to your operational needs

250+ Projects

30000+ hours

25+ industries

Industries we serve:

- Semiconductor
- EV Automotive
- Pumps & Motors
- Manufacturing
- R & D
- Packaging
- Electronics Manufacturing Service(EMS) Groups

We have

10+
LabVIEW
Developers

3+
LabVIEW
Architects

2+
LabVIEW
Associates

"Empowering Innovation Through Expert LabVIEW Solutions"

Our Valuable Clients :

Words of Semiconductor Client

Yoram Schwarz

Director of Software Engineering
PDF/SOLUTIONS™

"The Unilogic team has consistently delivered exceptional work. They design innovative and user-friendly interfaces, write clean and well-documented code, and provide thorough, step-by-step implementation documentation. They follow requirements and testing protocols with great attention to detail."

"Importantly, their team does more than simply execute assigned tasks – they proactively contribute ideas, challenge assumptions when needed, and help close gaps in specifications. Their ability to engage collaboratively and think critically has made them a true extension of our internal team.

We are very pleased with their contributions and fully expect our successful collaboration to continue."

Offshore Development center

- ▶ **PDF Solutions, San Jose, USA**
Ongoing support on eProbe tools for about **10+ years**
- ▶ **Flowserve, Saudi Arabia & Mexico**
Delivered an **automated pump test system** integrating sound and vibration analysis
- ▶ **Electrotechnik, Sydney, Australia**
Developed **advanced software tools** (Safe Grid, Cable HV, and Cable Pro (PC))
